

OUR MISSION?

To improve the lives of everyone we touch.

We are passionate about these principles - they're a part of everything we do. **How do YOU feel** about:

1. **Optimum Health?** We believe in vibrant well-being. That proactive is better than reactive and prevention is better than treatment. That addressing underlying causes is more productive than merely masking symptoms. That a healthy diet, lifestyle and natural remedies are often better than drugs and surgery.
2. **Nature and Science?** We believe that we are a part of nature and so we must live "in harmony with nature." That natural is better than synthetic. That nature holds the clues to good health. And that the role of science is to discover and harness nature's secrets.
3. **Quality?** We believe that quality matters. That quality and safety come first. That ingredient purity, freshness, potency and our unique formulations make all the difference. That providing natural products that actually work and provide the benefits that nature offers is vitally important.
4. **Leadership?** We believe that real leadership is sorely needed, now more than ever. That doing what is right because it is right, standing behind what we do, and doing what we say are important. That we must not just talk about problems, we must be part of the solution. That by offering a powerful vision and setting a good example, we can inspire others to follow. That, while the simple efforts of one person may appear to be small, when lots of us work together, we can make a huge difference.
5. **The Environment?** We believe that we don't have to hurt the planet in order to advance and prosper. That, in order to take care of ourselves, we must also take care of our homes, our communities, and the planet.
6. **Making a Difference?** We believe that "progress is the direct result of the service one renders to others." That by helping others and adding value, we are helping ourselves. That cooperation is better than competition. That the Golden Rule is a great way to do business and to live our lives.
7. **Sharing Success?** We believe that everyone should win. That you should be rewarded when you tell others about something great that makes their lives better. That abundance and unlimited prosperity can be enjoyed by everyone. That we can all "do well by doing good."

JOIN US: *Let's Make The World A Better Place!*

LET'S DO ~~NOTHING~~ BUT GOOD.

We're leading the way in making the world a better place. Want to help?

We're Shaklee Corporation. And as EPA Climate Leaders, we've committed to nothing. That's right. Zilch. We've pledged to completely offset our greenhouse gas emissions and run our business leaving no carbon footprint behind.

But not just for this year. For next year. And the year after that.

In fact, we were the first company in the world to be certified for having a net zero impact on the earth.*

Because, as pioneers in the natural nutrition industry, making people and the planet healthier not only comes naturally to us. It's our mission. Back in 1960, we created one of the first biodegradable cleaners ever. Since then, we've continued to break ground with products that clean house without dirtying earth. Products that purify our air and water. Products that improve health.

Along the way, we're showing how businesses can help solve some of the world's most pressing problems. Come see how at Shaklee.com. Because we hope you'll commit to doing nothing but good, too.
