

**The top 12 cancer causing products
(called "The Dirty Dozen") in the average home
include the following 6 items:**

(Source: The National Cancer Prevention Coalition)

- **Johnson and Johnson Baby Powder with Talc**
- **Crest Tartar Control Toothpaste**
- **VO5 Hair Conditioner**
- **Clairol Nice 'N Easy Hair Color**
- **AJAX Cleanser**
- **Lysol Disinfectant**

There has been a 28% increase in childhood cancer since the addition of pesticides into household products. (Source: National Cancer Institute)

In one decade, there has been a 42% increase in asthma (29% for men; 82% for women - the higher rate for women is believed to be due to women's longer exposure times to household chemicals.)

(Source: Center for Disease Control)

Due to the increase in toxic buildup in our bodies, including the toxic buildup of formaldehyde, dead bodies are not decomposing as fast as they used to. (Source: National Institute of Health)

What can you do to help your family?

Use non-toxic, Shaklee products in your home. Call Stewart Stevens of Partners For Healthy Living for more information: (562) 498-6800
